

# Rubber

## Silicones Applications

- Automotive Industry
  - Sealants
  - Gaskets
  - Connectors
  - Spark Plugs
  - Tires
  - Radiators, heat exchangers and water-pump gaskets
  - Cylinder head gaskets, engine covers, valve covers, oil pumps
- Aviation and Aerospace
- Bakeware and Cookware
  - Baking mats
  - Baking molds
  - Cake pans
  - Flexible bakeware
  - Garlic peelers
  - Ice and cube molds
  - Pan and gadget holders
  - Spatulas
  - Utensils
- Cable Accessories
- Electronics Industry
- Engines
- Medical Devices and Veterinary Applications
- Molding
- Semiconductors
- Toy Manufacturing

## Silicones Consumer Benefit

- Extraordinary versatile and convenient
- Offers a wealth of design opportunities
- Flows easily and can be molded, pressed or extruded
- Using relatively low amounts of energy
- Simplifying Production
- Resist temperatures and chemicals
- Easy to clean
- Fast curing properties maximizes industrial packaging and assembly
- Ready to process compound
- Indispensable and increasing number of application
- Do not produce unwanted odor or byproduct and are hypoallergenic
- Do not require harsh, damaging solvents
